BOGA VIVEK

CSE (Data Science) Undergraduate

+91-8121714172 vivekboga2006@gmail.com linkedin.com/in/vivekboga github.com/VivekBoga09

Summary

Computer Science and Engineering (Data Science) undergraduate with a foundation in Data Structures, Algorithms, and Full-Stack Web Development. Proficient in React.js, Node.js, Express.js, and MongoDB, eager to apply technical and problem-solving skills to build scalable software solutions.

Education

B.Tech in Computer Science and Engineering (Data Science) **2024-2028**
VNR Vignana Jyothi Institute of Engineering and Technology, Hyderabad *CGPA: 9.55 / 10*

Intermediate **2022-2024**
Sri Chaitanya College *Marks: 983/1000*

Projects

Amazon Price Tracking System (Chrome Extension) | *MERN, Puppeteer, Node-Cron* **GitHub**
- Engineered a full-stack MERN application to monitor Amazon product prices and track price fluctuations in real time.
- Developed a Chrome Extension that streamlines product tracking by allowing users to add Amazon products directly from product pages through RESTful API integration.
- Automated product price monitoring using Puppeteer and Node-cron, delivering real-time price-drop notifications through Telegram Bot API

Student Career Discovery & Guidance Platform | *React,Tailwind CSS,Node.js,Express.js,MongoDB,Firebase* **GitHub**
- Developed backend services for a career guidance platform for Class 9–12 students in collaboration with **JPMorgan Chase & Co.** and **Bikiran Foundation.**
- Built and integrated REST APIs with the React frontend for assessments, career profiles, and student progress.
- Bridged the career-guidance gap for rural and semi-urban students by providing accessible resources, career exploration, and mentor-support pathways.

Ambulance Priority Traffic Control System | *React, JavaScript, Express.js, Node.js, MongoDB* **GitHub**
- Designed a smart traffic management system that generates automatic green corridors for ambulances during emergencies.
- Constructed RESTful APIs using Node.js and Express.js and integrated MongoDB to manage traffic signal data and ambulance detection requests.
- Implemented intelligent signal-prioritization logic to detect approaching ambulances and dynamically regulate traffic flow at intersections.

Technical Skills

Programming Languages: Java, Python, JavaScript, C++, SQL
Web Technologies: HTML, CSS, React.js, Node.js, Express.js
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub, VS Code, Postman
Other: REST APIs, Puppeteer, Chrome Extensions, Node-cron

Relevant Coursework

Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Design and Analysis of Algorithms

Certifications & Training

- Software Engineering Program – JPMorgan Chase & Co. (Forage)
- Digital Transformation Simulation – ServiceNow & SmartBridge
- Python Programming – HackerRank
- Introduction to Generative AI – IBM

Achievements & Activities

- Selected to participate in **JPMorgan Chase Code for Good 2026 – Hyderabad**, collaborating on a technology solution for Bikiran Foundation.
- Active competitive programmer with a strong focus on Data Structures and Algorithms.
- Participated in ICPC programming contests, applying DSA to competitive problem-solving.
- Member, VJ Data Questers & Student Force, VNR VJIET.
